

IBM Planning Analytics

On Premises. On Cloud.

Training Courses

IBM Planning Analytics (TM1)

Onsite, Instructor-Led Training is considered to be most effective, which involves human interaction, in-depth information sharing and a direct response to questions. Few educational opportunities are considered more valuable than meeting and interacting with our expert instructors with years of field experience to share.

Course

IBM Planning Analytics (TM1)
End User

Duration: 1 Day

Type: Instructor Led

Location: On-Site

Knowledge Level: Beginner

IBM Planning Analytics (TM1) – End User Course (1 Day)

The End User Training Course is designed for users who will be responsible for analysing data, creating reports, templates and applications.

Overview: Through a series of lectures, demonstrations and hands-on exercises, students will learn how to access data stored in a TM1 model, how to create custom views, how to enter data, build reports and create applications for access via a browser.

Prerequisites: intermediate experience with Excel spreadsheets and an understanding of business metrics and drivers.

Performance Goals: Upon successful completion of this course, students will be able to:

- Understand Multi-Dimensional Analysis
- Use TM1 for Model Analysis
- Explore Model Data
- Create TM1 Spreadsheet Reports
- Create TM1 Web Reports and applications
- Perform “What-If” Analysis
- Organize and Distribute Results

Course

IBM Planning Analytics (TM1)
Developer

Duration: 3 Days

Type: Instructor Led

Location: On-Site

Knowledge Level: Intermediate

IBM Planning Analytics (TM1) – Developer Course (3 Days)

The Developer Training Course is designed for users who will be responsible for the design, development and deployment of TM1 within their organisation. This individual may also manage the data flow from source systems or files to TM1.

Overview: Through a series of lectures, demonstrations and hands-on exercises, students will learn how to design a multi-dimensional model, import and export data, write business rules, work with multiple cubes and setup user security.

Prerequisites: Completion of the TM1 End User course is mandatory or equivalent skill set is required.

Performance Goals: Upon successful completion of this course, students will be able to:

- Understand OLAP and TM1 Servers
- Create and Maintain Dimensions
- Build and Populate Cubes
- Add Business Rules
- Create Currency Translations
- Implement Security
- Understand Best Practices

Course

IBM Planning Analytics (TM1)
Administrator

Duration: 1 Day

Type: Instructor Led

Location: On-Site

Knowledge Level: Advanced

IBM Planning Analytics (TM1) – Administrator Course (1 Day)

The Administrator Training Course is designed for users who will be responsible for the security and administration of the TM1 environment at their organisation.

Overview: Attendees will learn how to use TM1 tools that will assist in optimizing performance of the application(s), how to manage user security and other administrative tasks.

Prerequisites: Completion of the TM1 End User course is mandatory.

Performance Goals: Upon successful completion of this course, students will be able to:

- Understand the TM1 Architecture
- Operate the TM1 Server
- Apply Security
- Perform Backup and Recovery
- Understand other Administrative Jobs
